Projects

Stock-ease | python,pyQT5,postgres SQL

- Implemented an inventory-management system named StockEase using Python and pgAdmin (PostgreSQL), enabling full CRUD operations—Create, Read, Update, Delete—for seamless stock control and data integrity.
- Developed real-time stock tracking and sales analytics, including dynamic stock-level dashboards and sales graph visualizations, facilitating quick insights into inventory movement and performance.

LeetCode Stats Viewer | JavaScript, HTML/CSS, LeetCode GraphQL API

- Engineered a responsive front-end interface with dynamic progress wheels to display solved problems by difficulty (Easy, Medium, Hard). Integrated with the LeetCode GraphQL API by implementing a secure CORS proxy and constructing precise queries to retrieve user submission data.
- Implemented robust client-side form validation using RegEx to ensure valid usernames before API calls, preventing unnecessary server load. Architected an asynchronous data fetching flow with comprehensive error handling and loading states for a seamless user experience.
